YOUR WORKSPACE

RideArrivo Workspace: README

Who this is for: Every employee.

The RideArrivo workspace is one place for your tasks, mail, calendar, chat, meetings and your department's tools. This guide is the quick start for everyone. Your own department has a more detailed README on its workstation page.

1. Your first 15 minutes

- Sign in and check the Dashboard: notifications, what needs your attention and your tasks.
- Open this workstation from the left menu and read the section list below once.
- Find your colleagues in Chat and say hello in the department room.
- Open ROOM 7 and note where meetings start, so the first call is not a scramble.

2. What you can do here

Area	What it is for
Dashboard	Your day at a glance: notifications, what needs your attention, delivery KPI and your daily note.
Tasks	Assignments, deadlines and approvals.
Chat	Direct messages, rooms and department chat.
Mail	RideArrivo company email.
Calendar	Meetings, deadlines and events.
ROOM 7	RideArrivo's own video meetings, with chat and notes saved per meeting.
Company files, Archive and Brand Library	Controlled documents and approved brand assets.
Knowledge Base	Playbooks, procedures and answers written by the company.
My Profile	Your details, photo and sign-in sessions.

3. A working day

Start of day

- Open the Dashboard and read Notifications and Needs your attention.
- Check Tasks for what is due today.
- Check Calendar for meetings and join with ROOM 7 where there is a code.

During the day

- Use Chat for quick questions and Mail for anything that needs a record.
- Search the Knowledge Base before asking; if the answer is missing, tell the admin team.
- Put meeting notes where the team can find them.

End of day

- Update your tasks so tomorrow starts clean.
- Add a line to your Daily note.
- Sign out on any device that is not yours alone.

4. Security and handling

- **Your login is yours.** Never share it, and never sign in on a shared or public computer. Use **Keep me signed in** only on a device that only you use.
- **Lock or sign out** when you step away. Use the sign-out option at the end of the day.
- **Customer and company data stays in company tools.** Do not copy it into personal email, personal cloud drives or chat apps outside RideArrivo.
- **Company Files downloads need approval.** Open documents in the workspace first. Request a download only when you truly need the original.
- **Report problems early.** A lost device, a suspicious email or a wrong access level is reported to Administration the same day.

5. Getting help

Ask in your department room in Chat first. For access, accounts or anything that looks wrong with the workspace itself, message Administration with a screenshot and the time it happened. If you think your account or a device has been compromised, say so at once.

Read-only guide, published by the engineering team. Version 3.0. If the app and this guide disagree, the app is right; tell Administration so the guide can be corrected.
