FINANCE

Finance & Accounting Workstation: README

Who this is for: Finance and accounting.

Maintain financial control, reconciliation and planning without exposing finance data outside authorised roles. Accounting, cash control, receivables, payables, budgeting, assets, tax and financial close.

1. Your first 15 minutes

- Sign in and check the Dashboard: notifications, what needs your attention and your tasks.
- Open this workstation from the left menu and read the section list below once.
- Find your colleagues in Chat and say hello in the department room.
- Open ROOM 7 and note where meetings start, so the first call is not a scramble.

2. What you can do here

Area	What it is for
General Ledger & Reporting	Chart of accounts, journals, trial balance, P&L, balance sheet and cash flow.
Receivables	Invoices, corporate balances, collections, ageing and follow-up.
Payables	Bills, vendors, approvals, obligations and payment readiness.
Cash & Banking	Providus balances, statements, transaction categorisation and reconciliation.
Payments & Settlements	Paystack/Flutterwave collections, settlements, refunds, transfers and disputes.
Budget & Forecast	Department budgets, scenario planning, variance and cash runway.
Expenses & Payroll	Expense control, reimbursements, payroll journals and approved payment inputs.
Tax & Statutory	FIRS, LIRS, pension and statutory obligation calendar with evidence.
Assets	Fixed assets, useful life, custody, disposals and accountability.
Close & Audit	Month-end/year-end close, reconciliations, evidence and audit trail.

3. Tools and shortcuts

Tools open in a new browser tab and use your own sign-in to that service. Request access from Administration if one is missing.

Tool or link	Use it for
FIRS TaxPro MAX	Federal tax filing and compliance administration.
LIRS eTax	Lagos PAYE and state tax administration.
PenCom Employer Hub	Pension employer compliance and clearance.
Google Sheets	Controlled finance modelling and reconciliations.

4. A working day

Start of day

- Check Cash & Banking for overnight movements and anything unmatched.
- Review Payables and Receivables due this week.
- Check the Close & Audit calendar for deadlines.

During the day

- Match payments and settlements to ledger entries as they arrive instead of at month end.
- Use FIRS TaxPro MAX, LIRS eTax and PenCom Employer Hub only for their statutory filings.
- Keep working papers in Google Sheets or the workspace so an auditor can follow them.

End of day

- Post what you reconciled today and flag what is still open.
- Sign out of every tax and banking portal.

5. Security and handling

- **Your login is yours.** Never share it, and never sign in on a shared or public computer. Use **Keep me signed in** only on a device that only you use.
- **Lock or sign out** when you step away. Use the sign-out option at the end of the day.
- **Customer and company data stays in company tools.** Do not copy it into personal email, personal cloud drives or chat apps outside RideArrivo.
- **Company Files downloads need approval.** Open documents in the workspace first. Request a download only when you truly need the original.
- **Report problems early.** A lost device, a suspicious email or a wrong access level is reported to Administration the same day.

> **For this department**
> • Finance data stays inside authorised roles. Do not forward statements or payroll details by email or chat.
> • Verify any change of bank details by a second channel before paying.

6. Getting help

Ask in your department room in Chat first. For access, accounts or anything that looks wrong with the workspace itself, message Administration with a screenshot and the time it happened. If you think your account or a device has been compromised, say so at once.

Read-only guide, published by the engineering team. Version 3.0. If the app and this guide disagree, the app is right; tell Administration so the guide can be corrected.
