LEGAL & COMPLIANCE

Legal & Compliance Workstation: README

Who this is for: Legal and compliance.

Manage contracts and regulatory obligations with controlled evidence, deadlines and cross-functional review. Contracts, regulatory obligations, privacy, evidence, renewals and legal service delivery.

1. Your first 15 minutes

- Sign in and check the Dashboard: notifications, what needs your attention and your tasks.
- Open this workstation from the left menu and read the section list below once.
- Find your colleagues in Chat and say hello in the department room.
- Open ROOM 7 and note where meetings start, so the first call is not a scramble.

2. What you can do here

Area	What it is for
Legal Intake	Structured requests, requester, priority, owner, due date and legal-service status.
Contract Lifecycle	Drafting, review, negotiation, version control, approvals, signature and repository.
Templates & Playbooks	Approved clauses, fallback positions, standard agreements and negotiation guidance.
Corporate & CAC	Board/corporate records, annual returns, directors, address and post-incorporation actions.
Privacy & NDPC	Data-processing register, rights requests, incidents, DPCO/CAR evidence and privacy governance.
Compliance Register	Obligations, owners, evidence, due dates, filings and remediation.
Regulatory Calendar	Licence, filing, policy, contract and statutory renewal deadlines.
Evidence & Investigations	Legal holds, incident evidence, privileged notes and investigation records.
E-signature & Audit	Approvals, signatures, completion evidence and immutable agreement history.

3. Tools and shortcuts

Tools open in a new browser tab and use your own sign-in to that service. Request access from Administration if one is missing.

Tool or link	Use it for
CAC iCRP	Corporate records, annual returns and post-incorporation filings.
NDPC	Nigeria data-protection compliance, audit and regulatory guidance.
DocuSign	Agreement approvals, signature and audit trails.
Google Docs	Controlled drafting, redlining and collaborative legal review.

4. A working day

Start of day

- Check Legal Intake for new requests and who owns them.
- Open the Regulatory Calendar for deadlines in the next 30 days.
- Check Contract Lifecycle for renewals and approvals due.

During the day

- Work from Templates & Playbooks so terms stay consistent.
- Record filings and registrations (CAC iCRP, NDPC) in the Compliance Register.
- Keep investigation material in Evidence & Investigations, never in personal storage.

End of day

- Update the status and next date on every matter you opened.
- Make sure signed documents are filed with their audit trail.

5. Security and handling

- **Your login is yours.** Never share it, and never sign in on a shared or public computer. Use **Keep me signed in** only on a device that only you use.
- **Lock or sign out** when you step away. Use the sign-out option at the end of the day.
- **Customer and company data stays in company tools.** Do not copy it into personal email, personal cloud drives or chat apps outside RideArrivo.
- **Company Files downloads need approval.** Open documents in the workspace first. Request a download only when you truly need the original.
- **Report problems early.** A lost device, a suspicious email or a wrong access level is reported to Administration the same day.

> **For this department**
> • Legal advice and privileged material are shared only with people who need it.
> • Evidence is preserved as found. Do not edit, rename or delete it.

6. Getting help

Ask in your department room in Chat first. For access, accounts or anything that looks wrong with the workspace itself, message Administration with a screenshot and the time it happened. If you think your account or a device has been compromised, say so at once.

Read-only guide, published by the engineering team. Version 3.0. If the app and this guide disagree, the app is right; tell Administration so the guide can be corrected.
