MARKETING

Marketing Workstation: README

Who this is for: Marketing team.

Plan, create, publish and measure RideArrivo campaigns. Marketing has its own workspace tabs for the work, plus quick links to the everyday tools.

1. Your first 15 minutes

- Sign in and check the Dashboard: notifications, what needs your attention and your tasks.
- Open this workstation from the left menu and read the section list below once.
- Find your colleagues in Chat and say hello in the department room.
- Open ROOM 7 and note where meetings start, so the first call is not a scramble.

2. What you can do here

Area	What it is for
Team	Who is in marketing and what they are working on.
Collaboration	Projects shared with colleagues, with invites and discussion in one place.
Discussion	Team conversation that stays with the work.
Digital Workstation	Paid acquisition, analytics, search and social tools in one place.
Strategy Workstation	Campaign planning and priorities.
Mood Board	Collect visual direction and references.
Intelligence	Market and competitor insight.
Wallet	Marketing budget and spend.
Finance Requests	Request money for campaigns through the approval route.
Execution	Track delivery of campaign work.

3. Tools and shortcuts

Tools open in a new browser tab and use your own sign-in to that service. Request access from Administration if one is missing.

Tool or link	Use it for
Google Ads	Search, display and campaign acquisition.
Google Analytics	Website and campaign performance.
Search Console	Search visibility and indexing.
Meta Business Suite	Facebook and Instagram pages and ads.
HubSpot Marketing	Email and lead nurturing.
Google Trends	What people are searching for.
PageSpeed Insights	Website speed checks.

Tool or link	Use it for
Canva	Design and quick graphics.

4. A working day

Start of day

- Check Collaboration and Discussion for anything waiting for you.
- Look at yesterday's numbers in Google Analytics.
- Check the calendar for campaign dates.

During the day

- Use the Brand Library for logos and approved assets, never an old copy.
- Request spend through Finance Requests before you commit money.
- Keep project files in the shared workspace so the team can see them.

End of day

- Update Execution with what moved today.
- Note what to test tomorrow.

5. Security and handling

- **Your login is yours.** Never share it, and never sign in on a shared or public computer. Use **Keep me signed in** only on a device that only you use.
- **Lock or sign out** when you step away. Use the sign-out option at the end of the day.
- **Customer and company data stays in company tools.** Do not copy it into personal email, personal cloud drives or chat apps outside RideArrivo.
- **Company Files downloads need approval.** Open documents in the workspace first. Request a download only when you truly need the original.
- **Report problems early.** A lost device, a suspicious email or a wrong access level is reported to Administration the same day.

For this department
• Use only approved brand assets and wording.
• Do not publish customer names, photos or testimonials without written permission.
• Ad accounts and the marketing wallet are for authorised people only.

6. Getting help

Ask in your department room in Chat first. For access, accounts or anything that looks wrong with the workspace itself, message Administration with a screenshot and the time it happened. If you think your account or a device has been compromised, say so at once.

Read-only guide, published by the engineering team. Version 3.0. If the app and this guide disagree, the app is right; tell Administration so the guide can be corrected.
