EXECUTIVE LEADERSHIP

CEO Executive Workstation: README

Who this is for: Leadership and management.

A focused leadership environment for company priorities, decisions, approvals, financial stewardship, service performance, growth, people and governance. Company-wide leadership, approvals, risk, operating performance and cross-functional decision control.

1. Your first 15 minutes

- Sign in and check the Dashboard: notifications, what needs your attention and your tasks.
- Open this workstation from the left menu and read the section list below once.
- Find your colleagues in Chat and say hello in the department room.
- Open ROOM 7 and note where meetings start, so the first call is not a scramble.

2. What you can do here

Area	What it is for
Executive Scorecard	Company KPIs, trends and exceptions across finance, service, growth and people.
Strategy & Priorities	Company objectives, owners, milestones and cross-functional follow-through.
Approvals & Decisions	Executive approval queue, decision log, blockers and accountable outcomes.
Financial Stewardship	Revenue, cash, budgets, obligations, runway and financial controls.
Service & Operations	Bookings, service quality, fleet, safety and operational performance.
Growth & Commercial	CRM, acquisition, marketing ROI, partnerships and commercial pipeline.
People & Organisation	Headcount, leadership accountability, performance, succession and organisation health.
Enterprise Risk	Legal, privacy, compliance, security and material operational risks.
Board & Governance	Board packs, statutory actions, resolutions and executive reporting.
Technology & Delivery	Product roadmap, reliability, security posture and release readiness.

3. Tools and shortcuts

Tools open in a new browser tab and use your own sign-in to that service. Request access from Administration if one is missing.

Tool or link	Use it for
Power BI	Executive dashboards and governed cross-functional analytics.
ProvidusBank	Authorised corporate banking access.
HubSpot	Executive CRM, commercial pipeline and customer visibility when connected.
Google Drive	Executive documents and controlled collaboration.
Google Meet	Leadership, partner and stakeholder meetings.

Tool or link	Use it for
LinkedIn	Executive network, partnerships and market intelligence.
Company CRM (inside the workspace)	Customer, corporate account and opportunity control.
Applications (inside the workspace)	Approved internal and managed company applications.

4. A working day

Start of day

- Open the Dashboard, then the Executive Scorecard, and read the exceptions first.
- Clear the Approvals & Decisions queue so nobody is waiting on you.
- Check Enterprise Risk for anything new overnight.

During the day

- Record decisions where the team can see them, with an owner and a date.
- Use the Company CRM and Applications links to reach detail instead of asking for screenshots.
- Use Google Meet and ROOM 7 for meetings, and share the code in chat.

End of day

- Leave no approval pending without a note saying why.
- Skim Service & Operations and Financial Stewardship for tomorrow.

5. Security and handling

- **Your login is yours.** Never share it, and never sign in on a shared or public computer. Use **Keep me signed in** only on a device that only you use.
- **Lock or sign out** when you step away. Use the sign-out option at the end of the day.
- **Customer and company data stays in company tools.** Do not copy it into personal email, personal cloud drives or chat apps outside RideArrivo.
- **Company Files downloads need approval.** Open documents in the workspace first. Request a download only when you truly need the original.
- **Report problems early.** A lost device, a suspicious email or a wrong access level is reported to Administration the same day.

For this department
• Banking access is for authorised people only. Never approve a payment from a link in a message; open the bank directly.
• Board and governance material is confidential until the board releases it.

6. Getting help

Ask in your department room in Chat first. For access, accounts or anything that looks wrong with the workspace itself, message Administration with a screenshot and the time it happened. If you think your account or a device has been compromised, say so at once.

Read-only guide, published by the engineering team. Version 3.0. If the app and this guide disagree, the app is right; tell Administration so the guide can be corrected.
