PARTNERSHIPS

Partnerships & Business Development Workstation: README

Who this is for: Business development and partnership managers.

Move partner relationships from prospecting through agreement, launch, referrals and renewal. Commercial relationships, opportunities, agreements, referrals and partner launch.

1. Your first 15 minutes

- Sign in and check the Dashboard: notifications, what needs your attention and your tasks.
- Open this workstation from the left menu and read the section list below once.
- Find your colleagues in Chat and say hello in the department room.
- Open ROOM 7 and note where meetings start, so the first call is not a scramble.

2. What you can do here

Area	What it is for
Partner CRM	Accounts, stakeholders, contacts, relationship history and account ownership.
Prospecting & Research	Target organisations, qualification, stakeholder mapping and outreach preparation.
Pipeline & Forecast	Opportunities, stage, value, probability, next actions and expected close.
Proposals & Commercials	Proposal versions, pricing, commissions, business case and negotiation history.
Agreements & Approvals	Commercial terms, Legal handoff, approvals, signature and obligations.
Partner Onboarding	Commercial, legal, finance, operations, technology and marketing launch readiness.
Referrals & Commission	Booking attribution, partner earnings, settlement status and disputes.
Partner Performance	Revenue, referrals, service quality, activity and relationship health.
Renewals & Expansion	Renewal dates, expansion opportunities, QBRs and next-phase planning.

3. Tools and shortcuts

Tools open in a new browser tab and use your own sign-in to that service. Request access from Administration if one is missing.

Tool or link	Use it for
HubSpot CRM	Partner accounts, contacts, activity history and pipeline when connected.
LinkedIn	Partner research, stakeholder mapping and professional outreach.
Google Maps	Hotels, institutions, travel businesses and geographic prospecting.
Google Meet	Partner discovery, negotiation and review meetings.
DocuSign	Proposal and agreement signature workflows.

4. A working day

Start of day

- Open Partner CRM and review deals that moved or went quiet.
- Check Pipeline & Forecast against this week's targets.
- Check Agreements & Approvals for anything waiting for signature.

During the day

- Log every partner conversation in the CRM the same day.
- Send proposals from Proposals & Commercials and get approval before sending terms.
- Use DocuSign for signatures so the audit trail is kept.

End of day

- Update next steps and dates on every deal you touched.
- Review Referrals & Commission entries for accuracy.

5. Security and handling

- **Your login is yours.** Never share it, and never sign in on a shared or public computer. Use **Keep me signed in** only on a device that only you use.
- **Lock or sign out** when you step away. Use the sign-out option at the end of the day.
- **Customer and company data stays in company tools.** Do not copy it into personal email, personal cloud drives or chat apps outside RideArrivo.
- **Company Files downloads need approval.** Open documents in the workspace first. Request a download only when you truly need the original.
- **Report problems early.** A lost device, a suspicious email or a wrong access level is reported to Administration the same day.

> **For this department**
> • Pricing and commercial terms are confidential until approved.
> • Do not promise a launch date until Partner Onboarding confirms it.

6. Getting help

Ask in your department room in Chat first. For access, accounts or anything that looks wrong with the workspace itself, message Administration with a screenshot and the time it happened. If you think your account or a device has been compromised, say so at once.

Read-only guide, published by the engineering team. Version 3.0. If the app and this guide disagree, the app is right; tell Administration so the guide can be corrected.
