PEOPLE & HR

People Operations Workstation: README

Who this is for: HR and people operations.

Run the complete employee lifecycle while keeping confidential people information inside HR controls. Recruitment, employee lifecycle, onboarding, leave, performance and people operations.

1. Your first 15 minutes

- Sign in and check the Dashboard: notifications, what needs your attention and your tasks.
- Open this workstation from the left menu and read the section list below once.
- Find your colleagues in Chat and say hello in the department room.
- Open ROOM 7 and note where meetings start, so the first call is not a scramble.

2. What you can do here

Area	What it is for
Employee Records	Secure employee system of record, organisation structure and self-service updates.
Recruitment & ATS	Candidates, roles, interviews, scorecards, offers and hiring pipeline.
Onboarding & Offboarding	Role-based checklists, documents, accounts, equipment, handover and access removal.
Time, Leave & Attendance	Leave balances, requests, approvals, schedules and attendance controls.
Performance & Goals	Objectives, reviews, feedback, development plans and manager accountability.
Payroll & Compensation Inputs	Approved salary changes, allowances, payroll inputs and compensation planning.
Benefits & Pension	Benefits administration, pension compliance and employee enrolment records.
Learning & Compliance	Training assignments, policy acknowledgement and mandatory compliance records.
Employee Relations	HR requests, welfare, grievances, letters and confidential case handling.

3. Tools and shortcuts

Tools open in a new browser tab and use your own sign-in to that service. Request access from Administration if one is missing.

Tool or link	Use it for
LinkedIn	Recruitment, sourcing and employer-brand research.
Google Meet	Interviews, 1:1s and employee meetings.
Google Docs	Controlled HR letters, policies and collaborative people documents.
PenCom Employer Hub	Nigeria employer pension compliance and clearance workflows.
LIRS eTax	Lagos PAYE and employer tax administration.

4. A working day

Start of day

- Check Recruitment & ATS for new applicants and interviews today.
- Check Time, Leave & Attendance for requests waiting for a decision.
- Check Onboarding & Offboarding for starters and leavers this week.

During the day

- Keep every employee change in Employee Records so one record tells the truth.
- Use Google Meet or ROOM 7 for interviews and send notes to the ATS straight after.
- Use PenCom Employer Hub and LIRS eTax only for the statutory filings they exist for.

End of day

- Update the status of every case you opened.
- Make sure nothing confidential is left open on the screen.

5. Security and handling

- **Your login is yours.** Never share it, and never sign in on a shared or public computer. Use **Keep me signed in** only on a device that only you use.
- **Lock or sign out** when you step away. Use the sign-out option at the end of the day.
- **Customer and company data stays in company tools.** Do not copy it into personal email, personal cloud drives or chat apps outside RideArrivo.
- **Company Files downloads need approval.** Open documents in the workspace first. Request a download only when you truly need the original.
- **Report problems early.** A lost device, a suspicious email or a wrong access level is reported to Administration the same day.

> **For this department**
> • Compensation, health, disciplinary and personal data stay inside HR. Do not paste any of it into chat or email.
> • Employee Relations cases are need-to-know. Do not discuss them outside the people involved.

6. Getting help

Ask in your department room in Chat first. For access, accounts or anything that looks wrong with the workspace itself, message Administration with a screenshot and the time it happened. If you think your account or a device has been compromised, say so at once.

Read-only guide, published by the engineering team. Version 3.0. If the app and this guide disagree, the app is right; tell Administration so the guide can be corrected.
